Pre-SB 423

Labs, testing of strains, testing and labeling of infused products.

Specialization, division of labor based on skill sets.

Record keeping by some providers, strain results for patients, business accounts.

Access/excess, prices dropping

Physicians available, average cost \$150, questions as to professionalism in isolated circumstances. Board of Med Examiners stopped traveling clinics. Advocates sought AMA accredited training for referring physicians.

Some growers using energy efficient growing methods (requiring smaller plants)

Providers reaching out to law enforcement with compliance questions

Post-SB 423

Labs not operating.

Only provider allowed to grow, deliver, manufacture, etc.

Patient record keeping and bank accounts are risky and could incriminate

Lack of access, prices rising

Some physician costs up ((\$350 reported for chronic pain referral). No training required.

Plant limits require larger plants.
Disincentive to energy efficient practices

Fear to contact law enforcement with questions
